

Irish-Name-Repo 1

Web Exploitation

Description:

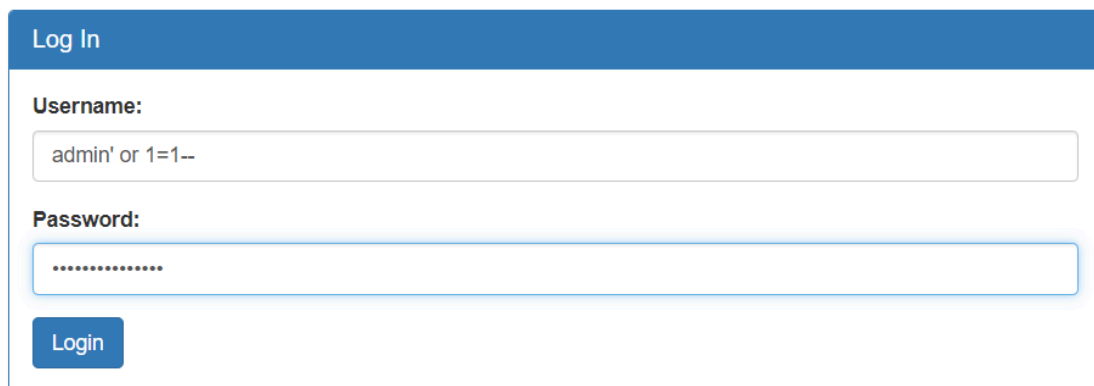

There is a website running at

<https://jupiter.challenges.picoctf.org/problem/33850/> ([link](#)) or <http://jupiter.challenges.picoctf.org:33850>. Do you think you can log us in? Try to see if you can login!

Hints:

- 1) There doesn't seem to be many ways to interact with this. I wonder if the users are kept in a database?
- 2) Try to think about how the website verifies your login.

Solution:

The screenshot shows a web interface for logging in. It has a blue header bar with the text "Log In". Below the header, there are two input fields. The first is labeled "Username:" and contains the text "admin' or 1=1--". The second is labeled "Password:" and contains a series of dots representing a masked password. Below the password field is a blue button with the text "Login".

Logged in!

Your flag is: picoCTF{s0m3_SQL_f8adf3fb}
