Web Exploitation

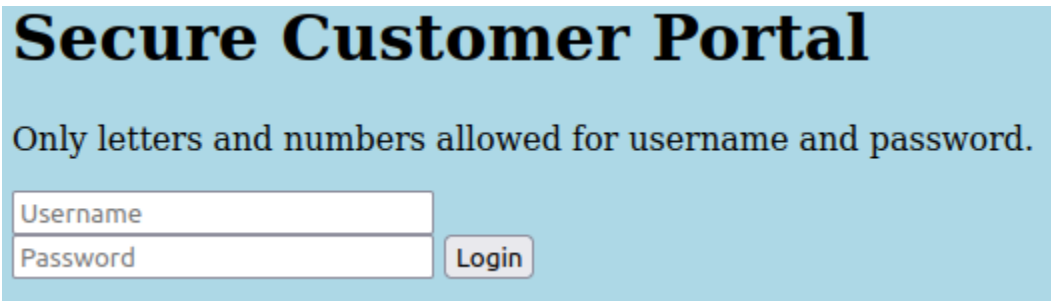

Description:

Can you get the flag?

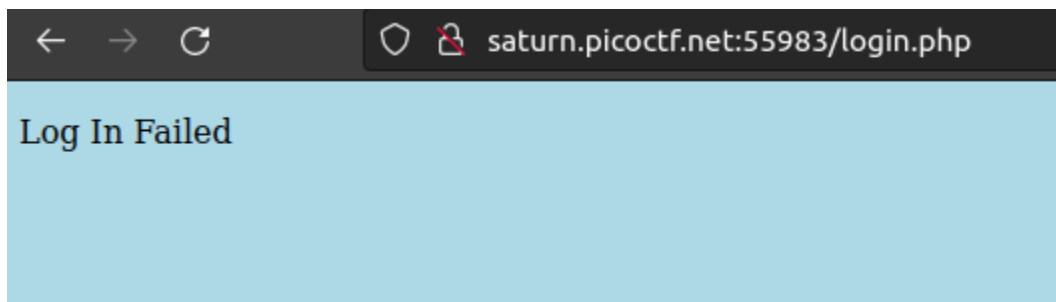

Hints:

- 1) How is the password checked on this website?

Solution:

- 1) When we try to log in using random username and password it doesn't work.

- 2) Then we use the web developer tools to see the secure.js file to see the required username and password to login.

```
function checkPassword(username, password)
{
  if( username === 'admin' && password === 'strongPassword098765' )
  {
    return true;
  }
  else
  {
    return false;
  }
}
```

3) After logging in we get the flag.

```
picoCTF{j5_15_7r4n5p4r3n7_a8788e61}
```

Flag:

```
picoCTF{j5_15_7r4n5p4r3n7_a8788e61}
```
