

# where are the robots

## Web exploitation

### Description

Can you find the robots?

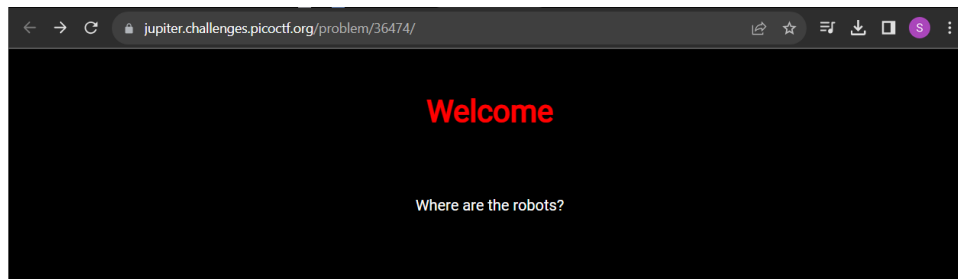

<https://jupiter.challenges.picoctf.org/problem/36474/>

### Hints:

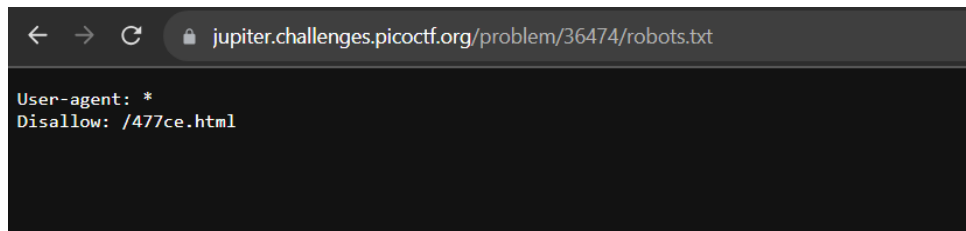

What part of the website could tell you where the creator doesn't want you to look?

### Solution:

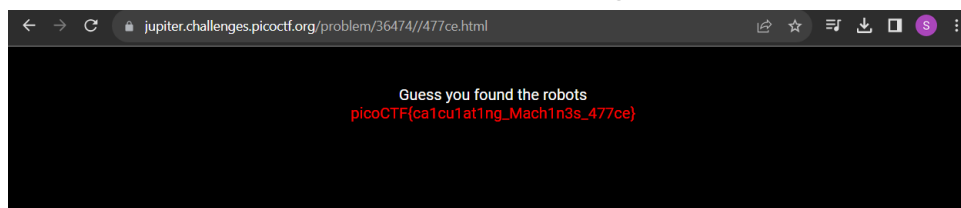

- 1) We open the website and inspect the page and view source but that doesn't lead us anywhere.
- 2) We then try to look for files that may be hidden in there.

- 3) There is a file named robots.txt.

- 4) This tells us that the flag might be hidden in this url.
- 5) We check it out and find the flag.
